

FINSTOP

Finstop is a new technically tested groove rubber innovation for fastening barrels to a pallet. Finstop is for safe transportation of liquid or solid substances in barrels or barrel like units everywhere.

Finstop is a solution for transportation safety and responsibility

ADVANTAGES OF FINSTOP:

- > quick and easy fastening
- > ecological solution as plastic wrap is no longer required
- > improves logistical safety
- > suitable for various industries
- > re-usable product for circular economy

USAGE:

- > can be used anywhere and when ever plastic, wooden or metal barrels are secured to pallets
- > for all transportation of materials or substances in barrels
- > typical users include chemical and oil companies, refineries etc.

IPR:

- > The product is design protected in EU and Norway
- > The product is trademark protected in EU

Measurements and technical data:

- > width 50 mm
- > width of the groove 12 mm
- > height 23 mm
- > quality TPV
- > weight 12 g
- > colour green
- > non-toxic

Order and delivery:

- > order unit quantity 400 pcs
- > packed in ecological bag
